FIC

NORTH AMERICA

2022

THE EDITO

By Vincent Riou, Partner, Avisa Partners

Partner of Avisa Partners, one of the leading French firms in economic intelligence and operational cybersecurity, since the merger with CEIS, he is in charge of the international development of the FIC.

The “FIC North America”, a new event at the heart of North American ecosystems

To further promote international cooperation, spread innovation at the global level, and consolidate links between Europe, Canada, and the United States in the field of digital trust and security, a North American FIC will be organised each year in Montreal—a deeply multicultural and open city, North American in its culture and European in its history. Its first edition will be held in November 2022...

CYBER

INFO

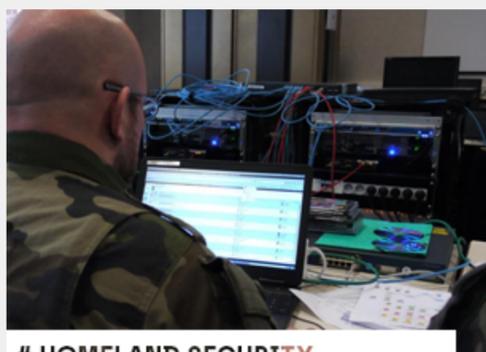

CYBER CRIMINALITY

Killware puts people’s lives at risk

Unlike conventional malware, killware is not intended to manipulate data or damage hardware, but to specifically injure or kill people. Many experts believe that killware will play a major role in cybersecurity in the future.

HOMELAND SECURITY AND DEFENCE

What the cyber war in Ukraine says

Power grids neutralised, institutional websites hacked, personal data published on the net: the cyber offensive suffered by the country illustrates the new rules of the game of hybrid war.

CYBER RISKS

What solutions can ensure the cybersecurity of biomedical equipment?

As the digitisation of health care institutions develops rapidly to meet the needs of both patients and healthcare professionals, the vulnerabilities identified are proportionally increasing, thus leading to a growing risk of cyberattack.

DIGITAL TRANSITION

Metaverse: the next version of the internet is on its way and Europe does not seem to be interested

The term ‘metaverse’ originated in the science fiction of the 1990s and means the joining of the physical and virtual worlds. For many commentators and instigators, this is the future of the internet. Gone are the websites and mobile applications as we know them: welcome to the metaverse.

FIC

NEWS

[FIC 2022] Registration is open: mark your calendars!

The FIC team is pleased to announce the **opening of registrations for the FIC 2022**, which this year will have the theme “**Shaping Europe’s digital future**”.

This new edition will take place on **Tuesday 7, Wednesday 8 and Thursday 9 June 2022 at Lille Grand Palais**.

With over 12 500 participants from 100 different nationalities in September 2021, the FIC has become the European reference event on cybersecurity and digital trust. It brings together all the European and French actors of the sector.
