## # THE EDITO

**By Hervé le Jouan**

As an entrepreneur specialising in new technologies, he has joined, co-founded or founded companies or organisations to launch and drive market innovations in various sectors such as AI, FinTech, information technology, digital media measurement, digital transformation, mobile marketing, data protection and cyber security.

### The protection of citizens and children on the Internet, a priority issue in 2023

2022 will have seen another explosion in the number of Internet scams. Hackers are becoming more and more professional. They also use all the communication means at their disposal by exploiting our weaknesses and technological flaws. Today, it is clear that our children are increasingly exposed. In a very tense global context, it is time for politicians to put the protection of citizens, and especially children, at the top of their priorities.

### # SECURITY & STABILITY IN CYBERSPACE

#### From Ukraine to Pakistan, a journey to the heart of Internet geopolitics

By Richard Dalleau

The Internet is a constrained space, with its own bottlenecks, center and periphery, its land and sea powers. This is one of the conclusions of the colloquium on the geopolitics of Internet routes held on December 16, 2022. The GEODE research center gathered a rich sample of academics and professionals to talk about Ukraine, sovereignty, and the future of the Internet. An overview.

### # DIGITAL TRANSITION

#### Cybersecurity Maturity in the UAE: A fast and continuous improvement process

By Antoun Beyrouthy

The Emirate has been rapidly maturing in the cyber sector, both in the public and private sectors. It took the country only one year (from 2019 to 2020) to move from 33rd to 5th place, according to the Global Cyber Security Index.

### # SECURITY & STABILITY IN CYBERSPACE

#### Ukraine: mobile apps, a new weapon

By Pierre-Yves Baillet

Ukrainian forces have managed to stop, and reverse, Russia's progress, thanks to Western support. Ukrainian ingenuity has also been a decisive factor in several areas, particularly in militarizing mobile apps.

### FIC 2023: the detailed programme

*April 5 to 7, 2023*

On the occasion of this new edition of the FIC, several formats are expected: plenary sessions, conferences, technical demonstrations, attack demonstrations, FIC Talk and masterclass.

In its 15 years of existence, the European FIC – International Cybersecurity Forum – has become the largest cybersecurity and digital trust event on the continent, with 19,000 participants, 550 private and public sponsors, 520 speakers and 60 countries represented in 2022. Thanks to the support of the Quebec, Canadian and French authorities, the event is crossing the Atlantic to become a biennial event alternating between Europe and the American continent.
